Thanks Tammy.

Stephane / George,

Are you acquiring this information, in a timely manner, from the PLT's when they are provided the information? It would appear that there is Intelligence Information that may be getting missed, or acted upon, if you and the team don't get.

Mark

In the PLT log from 2022Jan29, there is information that the Command Post is located at the **Swiss Inn on Daly Street (89 Daly Ave).**

In follow up on 2022Jan31, there is a entry in the PLT log that indicates that PLT attended the Swiss Inn and noted the following:

PLT attended the Swiss Hotel at 89 Daly St. Danny Bulford (RCMP who resigned as a result of vaccine mandate, former personal sniper to the PM as per Rebel News) and company (approximately 10 people including an Ottawa paramedic on unpaid leave as a result of the vaccine mandate) have a war room set up in the basement. Laptops, desktop monitors open with maps of downtown. Claims to be coordinating medical, security and food service through the Adopt A Trucker program. Not coordinating fuel or movement of trucks. Adamant that they are only supporting the truckers for the above mentioned purposes. Truckers are communicating with Bulford's team via RED, can also be used for tracking purposes. Claims Tamara is overwhelmed with trying to coordinate the Go Fund me money. Bulford is happy to continue liaising with PLT ASKIN or anyone else if he isn't available

There is also the following log that indicates there is another Command Centre at **Arc Hotel on Slater Street (140 Slater St)**

Spoke to BARBER (west convoy). Need a couple hours to communicate message to as many convoy members as possible, that trucks will be repositioned / moved IOT open up lanes for local traffic and emergency vehicles. Expecting OPS to give direction on available spots (roads, lanes, etc). BARBER said they are looking to do rolling convoys in

town. Confirmed two “war rooms”: one at Arc Hotel (slater street) Canada unity, and one at Swiss Hotel (Daly Ave), Take Action Canada

There are numerous comments in the PLT log that I will take a few minutes to read through.

It there is anything else of interest, I will follow up with everyone.

T
